

CORE PRODUCTS 2026

PROTECTING BYSTANDERS AROUND THE WORKSPOT

OUR MISSION.

We create safe working environments worldwide with reliable solutions for welding safety. Through craftsmanship, personal commitment and genuine collaboration, we ensure it works for every customer, in every situation.

OUR VALUES. OUR PROMISE.

QUALITY

We always strive for the best solution. No compromises, only products and services we can fully stand behind. Quality is not just a promise, it is our standard, with the customer always at the centre.

CONNECTION

Strong relationships form the core of Cepro. We invest in personal contact with customers, dealers, suppliers and colleagues. Together, we build sustainable cooperation where everyone feels valued.

TRUST

A deal is a deal. Customers and partners can rely on us. We do what we say and say what we do, and have done so for years. This makes Cepro a reliable partner in every collaboration.

COMMITMENT

Every request, large or small, receives our full attention. We listen, think along actively and take that extra step. This makes us valued not only as a supplier, but as a partner you can rely on.

PRIDE

We are proud of who we are and what we do. We care for each other and for our work. This dedication is reflected in solutions that not only meet expectations but often exceed them.

GROWTH

At Cepro, there is room for development, for people and for partnerships. By combining experience with new ideas, we continue to improve. We grow together, with respect for where we come from and ambition for where we are heading.

OUR VISION.

Cepro envisions a world where safety, trust and quality are the standard at every workplace. We believe that long-term relationships, human connection and smart innovations go hand in hand. As a trusted partner, Cepro aims to be present in every country where recognised safety standards apply. We strive for global impact, with the heart of a family business.

SAFE, RELIABLE AND CERTIFIED WELDING PROTECTION

Why protection matters

Welding is an essential process in countless industries, but it also brings risks that should never be underestimated. Exposure to welding light, sparks, spatter, noise or even outdoor conditions can cause serious health issues, damage materials, and disrupt production. Protecting welders and bystanders is therefore not only a matter of safety, but also of quality, efficiency, and continuity in the workplace.

Complete solutions from Cepro

At Cepro, we provide complete solutions for welding protection. From curtains, screens and blankets to outdoor shelters and turnkey installations, our products are designed to create safe, comfortable and practical work environments. Every solution is thoroughly tested and certified according to the latest European standards, ensuring long-term reliability and compliance.

Safety without compromise

Safety should never mean compromise. That is why our protective materials combine transparency and visibility with durability and flame-retardancy. They safeguard people without closing off the workplace, making it possible to monitor activities, respond quickly to emergencies, and maintain a productive workflow.

Always the right fit

No two workplaces are the same. Whether you need fixed or mobile protection, lightweight or heavy-duty materials, or customised shielding for specific environments, Cepro offers the right solution. Our experts work with you to assess risks and requirements, ensuring an approach that is both safe and practical.

A trusted partner in welding protection

With Cepro, you don't just purchase a product, you gain a trusted partner in workplace safety. Together, we make sure every welding environment is shielded against hazards, while supporting efficiency, quality, and the well-being of your team.

WELDING CURTAINS

Welding curtains and strips are designed for use in workplaces where bystanders must be protected against the hazardous radiation emitted during welding work. Cepro supplies welding curtain in four welding protective colours : Cepro Orange Transparent, Cepro Bronze Transparent, Cepro Green Transparent and Cepro Dark Green non-transparent.

All these colours comply with the European standard for welding curtains and welding strips EN ISO 25980 (formerly EN-1598).

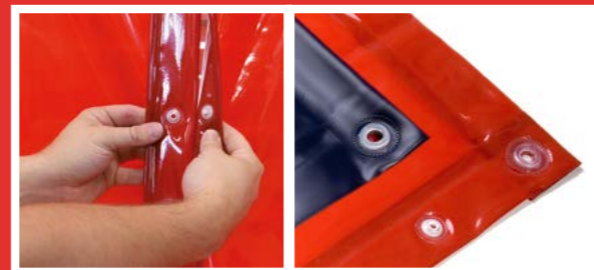

Cepro welding curtains also have a standard width of 140 cm or 220 cm, are provided with a **5cm seam all around**, suspension eyelets at the top and snap-fasteners on both sides. Thickness 0,40mm.

All standard welding curtains are supplied **incl. steel suspension rings**.

Dark Green non-transparent – Cepro Dark Green non-transparent is used around welding processes with very intense radiation. It is the most dark colour in our range. Furthermore, it is specially recommended as a partition between different welders.

Orange Transparent, Green Transparent and Bronze Transparent

These colours are transparent which allows a good overview of the work area; this creates safety and prevents welders from feeling isolated. These transparent welding colours can be used in nearly all work situations.

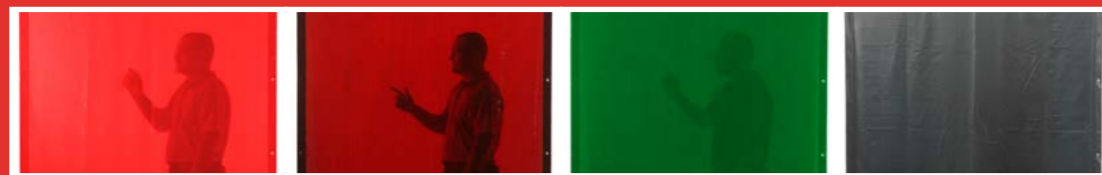

Available sizes

160 x 140 cm	240 x 140 cm
180 x 140 cm	260 x 140 cm
200 x 140 cm	280 x 140 cm
220 x 140 cm	300 x 140 cm

160 x 220 cm	180 x 120 cm
180 x 220 cm	180 x 180 cm
	180 x 240 cm

Made to size curtains are available on request.

WELDING STRIPS

Welding strips and welding curtains offer the same visual protection. The choice is determined by the mechanical load which the separation is exposed to. We recommend using welding strips for large or frequent mechanical loads.

Cepro welding strips:

- ▶ available in a thickness of 2 and 3mm,
- ▶ 300mm wide
- ▶ can be cut and punched to the desired size
- ▶ can be supplied in either full rolls (50 meters long) or half rolls.
- ▶ can be supplied with plastic Cepro suspension clips that fit on a 35mm Ø pipe.

Cepro supplies welding strips in four welding protective colours : Cepro Orange Transparent, Cepro Bronze Transparent, Cepro Green Transparent and Cepro Dark Green non-transparent.

All these colours comply with the European standard for welding curtains and welding strips EN ISO 25980 (formerly EN-1598).

Available sizes

300 x 2mm
300 x 3mm

Cepro welding strips can be delivered cut to size and punched with the Cepro hole pattern and are also available on full rolls of 50 running meter.

WELDING BLANKETS

Cepro offers an extensive product package to provide shielding against sparks and welding spatters. Almost Cepro welding blankets have been tested according to the specifications of the European standard EN 13501-1 and do not contain any asbestos or ceramic fibres. Cepro recommends using multiple layers and the usage of the blanket at an angle of the welding arc, for the best protection.

In order to help you choosing the blanket suitable for you, we have divided our welding blanket into 3 product groups:

► **Premium welding blankets**

Welding blankets produced from high quality raw material. They also meet the highest available standards.

► **Basic welding blankets**

Allround welding blankets with an excellent price - quality ratio.

► **Economy welding blankets**

Welding blankets which combine quality with a competitive price.

Besides our extensive range of welding blanket, Cepro also offers you a broad range of insulation products.

Available qualities Premium welding blankets

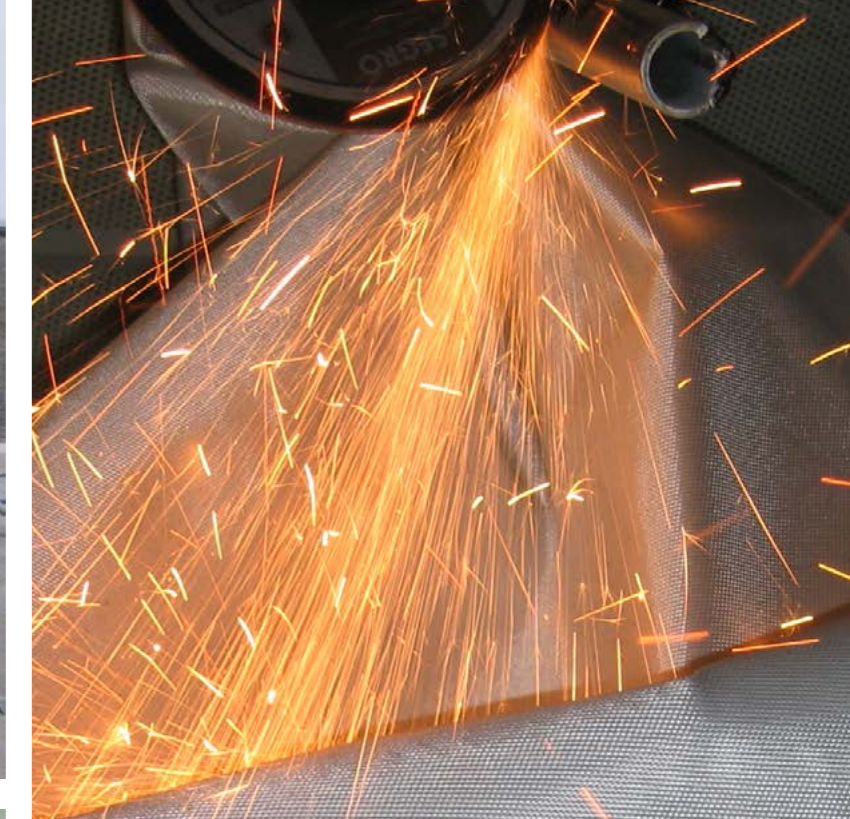

Quality	Base	Peak temp.	Thickness
Olympus	Silica	1300 °C	1,3mm
Hercules	Fibreglass	900 °C	1,6mm
Sirius	Fibreglass	1000 °C	1,4mm
Thetis	Fibreglass	900 °C	1,5mm
Athos	Fibreglass	900 °C	1,6mm
Ares	Fibreglass	550 °C	1,3mm

Available qualities Basic welding blankets

Quality	Base	Peak temp.	Thickness
Leto	Silica	1300 °C	0,70mm
Pallas	Fibreglass	750 °C	0,70mm
Arges	Fibreglass	550 °C	0,45mm
Asteria	Fibreglass	600 °C	0,75mm
Atlas	Fibreglass	600 °C	0,70mm
Kronos	Fibreglass	600 °C	0,68mm

Available qualities Economy welding blankets

Quality	Base	Peak temp.	Thickness
Athena	Fibreglass	600 °C	0,41mm
Apollo	Fibreglass	600 °C	0,43mm
Ceto 2	Fibreglass	600 °C	0,44mm

WELDING SCREENS

In addition to a wide-range of other products, Cepro can also provide the necessary materials to construct a welding booth as a permanent fixture.

We can also supply a mobile welding booth which is suitable and easier to move to different locations. Not only do these booths provide protection but they also offer flexibility for organizing workspace. They provide an optimal solution because they can be quickly dismantled and removed from the work floor when welding work is not being carried out.

The Cepro welding screens programme is divided into 3 product groups which are suitable for various applications.

► **Cepro Robusto**

Highly robust screens designed for intensive use. Built to withstand tough working conditions.

► **Cepro Omnium**

A stable, neatly finished welding screen with wide-ranging applications. Perfect as an all-round solution for many workshops.

► **Cepro Gazelle**

Lightweight and easy to move. Ideal for smaller workshops or when frequent repositioning is required.

Available models Robusto welding screen

- Single screen, 215cm wide
- Triptych screen, 215cm wide + 2 swivel arms each 70cm
- Triptych XL screen, 215cm wide + 2 swivel arms each 110cm

Available models Omnium welding screen

- Single screen, 215cm wide
- Triptych screen, 215cm wide + 2 swivel arms 80cm each
- Triptych XL screen, 215cm wide + 2 swivel arms 110cm each

Available models Gazelle welding screen

- Single screen, 200cm wide
- Single screen, 140cm wide

OUTDOOR WELDING

When welding in the open air it is important to be protected from all kinds of weather, such as rain, wind, sun, etc. Working conditions are noticeably improved if a welding tent or welding umbrella is used. This level of protection for the welder has proved to contribute to a reduction in sick leave.

Cepro welding tents are extremely suitable for work in the open air. Work can be continued for longer periods and due to the improvement of working conditions, sick leave will be greatly reduced and a higher productivity can be achieved.

Cepro welding umbrellas are specially designed for working outdoors. They provide reliable temporary protection of the work site from sun or rain.

Standard models welding tent

- ▶ Cube model, width 190cm, depth 200cm, ridge height 220cm

Heavy Duty models welding and working tent

- ▶ Heavy Duty, width 300cm, depth 200cm, ridge height 240cm
- ▶ Heavy Duty, width 300cm, depth 400cm, ridge height 240cm
- ▶ Heavy Duty, width 400cm, depth 200cm, ridge height 250cm
- ▶ Heavy Duty, width 400cm, depth 400cm, ridge height 250cm

OTHER DIMENSIONS ARE AVAILABLE ON REQUEST.

Available models welding umbrella

- ▶ Welding umbrella, Ø 220cm
- ▶ Welding umbrella, Ø 300cm

FROM PRODUCT TO A COMPLETE SOLUTION

At Cepro, our work doesn't end with supplying products. Globally, we deliver turnkey projects where we work together with the customer to find the right solution for specific situations in workshops, welding areas or production zones.

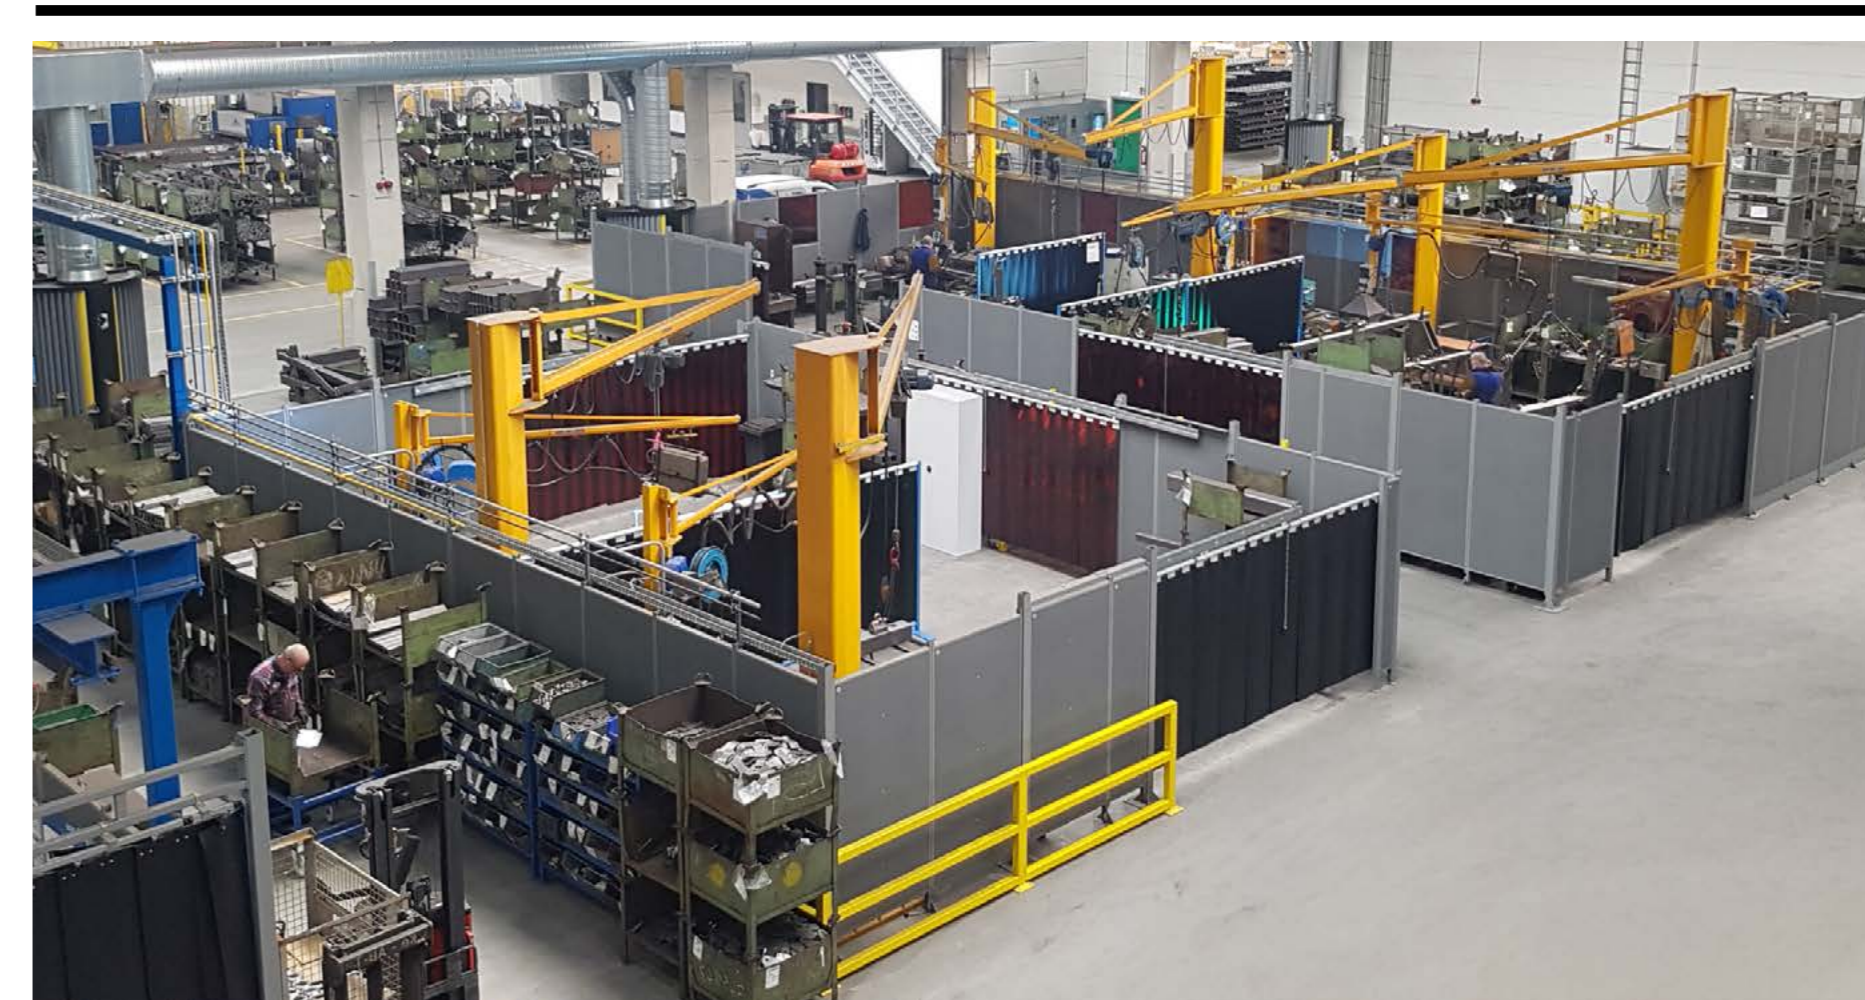

We actively help identify the root of the problem, advise on the best solution, and ensure fast, professional delivery, including installation if required. Always with high-quality, certified Cepro products and expertise that goes beyond the product alone.

Our dedicated project catalogue offers insight into a variety of customer projects where functionality, safety and custom design come together.
